Software Developer experienced in full-stack development and building business applications. Skilled in C#/.NET, React, TypeScript, Python/Django, and SQL, with experience in automation, data reconciliation, and system integration across diverse software development projects.

PROFESSIONAL EXPERIENCE

Giligan's Holdings Corporation

Mandaluyong City, PH

Software Developer

October 2025 – Present

- Reduced manual reconciliation workload across 100+ branches by developing Gi-Recon with Electron, React, TypeScript, and SQLite to automate POS, GrabFood, and Foodpanda data reconciliation, identify missing orders/invoices, and streamline discrepancy reporting.
- Improved internal workflows and reduced repetitive manual tasks through full-stack development, system maintenance, and troubleshooting, implementing features that automated processes and centralized data while resolving bugs, addressing technical issues, and improving system reliability.

Cooperative Bank of Quezon Province

Lucena City, PH

Software Developer Intern

March 2025 – June 2025

- Developed and deployed web-based business systems using Django, PostgreSQL, and Tailwind CSS, including a Fixed Furniture & Equipment Inventory System for multi-branch asset management and a secure voting platform used during the CBQP General Assembly.
- Collaborated with two Software Developer Interns, an IT Manager, and business stakeholders throughout the software development lifecycle, contributing to requirements gathering, system design, database development, feature implementation, testing, debugging, and deployment of the FFE Inventory and Voting systems.

Freelance Full-stack Developer

Lucena City, PH

November 2023 – June 2024

- Collaborated with a cross-functional team of 4 developers, designer, and project manager to develop Queatives, a web-based job platform connecting job seekers with employment opportunities across Quezon Province.
- Developed full-stack features for job posting, search, and user profiles, supporting opportunities for non-professional and community-based roles such as carpenters, farmers, and dance instructors.
- Translated project requirements and UI designs into functional, user-focused features, collaborating with the team throughout development and refinement.
